Professional Summary

Data Analyst skilled in **Python, SQL, and Power BI** with proven experience building end-to-end data pipelines, ETL workflows, and KPI dashboards on datasets of **48K+ records**. Adept at transforming complex data into clear business insights through **EDA, visualization, and statistical analysis**. Seeking to contribute a data-driven approach to help organizations make smarter, faster decisions.

Education

Kolhapur Institute of Technology **Dec. 2022 – Jun 2026**
Bachelor of Technology in Computer Science(Data Science) *Kolhapur,Maharashtra*
GPA:7.79/10

New Model JR. College,Kolhapur **2020 – 2022**
Higher Secondary Certificate *Kolhapur,Maharashtra*

Experience

Vinayak IT Solutions **March 2026 – July 2026**
Data Science Intern *Kolhapur,Maharashtra*

- Performed **data cleaning, preprocessing, and exploratory data analysis (EDA)** using **Python (Pandas, NumPy)** to prepare structured datasets for business analysis and predictive modeling.
- Developed **ETL workflows** and SQL-based data transformation pipelines to extract, clean, and organize data for reporting and analytical applications.
- Conducted **feature engineering**, including missing value treatment, outlier detection, data transformation, and feature scaling to improve data quality.
- Designed interactive **Power BI dashboards** with KPI tracking, trend analysis, and business visualizations for data-driven decision-making.
- Developed and deployed **Flask-based web applications** by integrating trained machine learning models for real-time predictions.

Projects

Pizza Sales Performance Analysis and Dashboard GitHub | *Python,SQL,Power BI* **March 2026**
* Built 15+ PostgreSQL queries to analyze revenue, order trends, and KPIs from a 48K+ row sales dataset.
* Developed an ETL pipeline using Python (Pandas, SQLAlchemy) to load CSV data into a PostgreSQL database.
* Performed revenue segmentation by pizza category and size to identify top to bottom 5 products by sales and quantity.
* Built an interactive Power BI dashboard with KPI cards, trend charts, and category-wise sales breakdown.
* Discovered trends in user engagement and category-wise demand.

Netflix Content Analysis using SQL and Python GitHub | *SQL,Python,Psycopg2* **February 2026**
* Analyzed Netflix dataset using SQL and Python (Pandas, NumPy) to uncover content trends and distribution patterns and regional trends.
* Discovered top-performing categories and engagement patterns, enabling data-driven content strategy decisions
* Built interactive Power BI dashboards with KPI tracking, filters, and drill-down insights for stakeholder reporting
* Performed data cleaning and transformation, improving dataset usability for analysis
* Generated insights on subtitle language coverage (26+ languages) to support global audience expansion

Time Series Forecasting using LSTM GitHub | *Python, Flask,Streamlit,Deep Learning* **December 2025**
* Developed a multi-asset price prediction system supporting Ethereum, Gold, Silver, and Crude Oil using LSTM-based time-series forecasting models.
* Integrated real-time and historical market data using the yFinance API for dynamic data ingestion and live analysis.

* Implemented data preprocessing pipeline including normalization (MinMaxScaler) and 100-day sliding window sequence generation for model training.
* Applied technical indicators such as 200-day EMA and 365-day Moving Average to enhance feature representation and trend learning.
* Built an interactive Streamlit-based dashboard with live TradingView visualizations, historical price charts, and prediction outputs.
* Visualized Actual vs Predicted prices and error trends, improving model evaluation and interpretability

Technical Skills

Programming: Python (NumPy, Pandas, OOP), SQL(CTEs,Joins,Window Function), HTML/CSS
Data Analysis: EDA, Data Cleaning, Data Wrangling, Statistical Analysis, Data Storytelling
Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Feature Engineering, Model Evaluation, Scikit-Learn
Visualization & BI: Power BI, Tableau, Excel (Pivot Tables, VLOOKUP, XLOOKUP), Matplotlib, Seaborn, KPI Analysis, Dashboarding
Tools & Platforms: PyCharm, Jupyter Notebook, Google Colab, GitHub, Microsoft Power BI
Deployment & Frameworks: Flask, FastAPI, Streamlit

Certification/ Extracurricular

* Data Analytics Essentials: Cisco Networking Academy
* Hacker Rank: SQL(Basic)
* Infosys Springboard: Python Certification
